2023

1. Logo

2. General description

This project presents the development of my own web portfolio to share my career and experience as a developer for the general public. The website will be available to anyone interested in learning more about my skills and experience, and will be developed using my knowledge of HTML, CSS and JavaScript acquired over time.

Through the website, visitors will be able to explore detailed information about my training, projects and career, as well as gain insight into the knowledge of the technologies that I have acquired in my career as a developer. The website design will be modern and attractive, with a focus on ease of navigation and accessibility for visitors.

3. Goals
   a. General

   Develop a web page describing my skills to attract potential employers who may be interested in my work.

   b. Specific
      i. Develop a project plan that includes planning, design and production stages, for the creation of a web page.
      ii. Apply acquired JavaScript, CSS and HTML skills to create a visually appealing and interactive web page.
      iii. Design the web page using responsive design techniques and tools to ensure correct display on different devices, without compromising functionality.
      iv. Allow the web page to be accessible to any user from the web.

  v. Develop a web page that has accessibility, so that in this way it is guaranteed the basic accessibility standards are met and that it adapts to different user needs.

4. Public Purpose

This project is aimed at potential employers interested in developers with my profile. To achieve this goal, it is necessary to present a web page that shows you some of my skills.

5. Competence

Any other developer with web pages with the same objective.

6. Distribution

Website: GitHub Pages - nicolas1102.github.io/portfolio/

7. Timeline
 a. Logo creation: May 1, 2023
 b. Definition of general and specific objectives: May 1, 2023
 c. Completion of the Brief: May 2, 2023
 d. Wireframes: May 4, 2023
 e. Development: May 4, 2023
 f. Website Deployment: May 8, 2023
 g. Demo: 9 May 2023
 h. Final delivery. May 26, 2023
